### **1.1.1 The Institution ensures effective curriculum delivery through a well-planned and documented process**

Effective curriculum delivery is the heart and soul of the college and is ensured through a well-planned and documented process. Semester readiness starts with the academic calendar, which is prepared after studying the university academic calendar which includes the important activities and events to be conducted throughout the session. The next important activity related to curriculum delivery is load distribution, which is also done in advance considering experience and specialization of the faculties. The college allows complete freedom to students to make a choice of offered elective courses and this is also done through a documented process before preparation of Timetable. Timetable committee prepares the timetable. Each course faculty then prepares its Lesson / Teaching Plan and Laboratory Plan according to the timetable and Academic Calendar. The LP/TP presents a complete roadmap about how each faculty is going to do the effective delivery of their syllabus. Orientation program and Skill Development Programs are conducted during the first week of every new session i.e. at the start of the semester to introduce skills and knowledge beyond the syllabus and make our students ready to face the challenges of engineering. Course syllabus and course outcomes are conveyed to students in the very first lecture of course. CO-PO-PSO mapping is done, and attainment computation is done at the end of every semester to find the gap analysis. The course files of faculties are monitored twice a semester by the documentation committee through internal audit team and reports are prepared and shared with Principal, Dean Academics, Dean IQAC and faculties. Course completion as per the LP/TP is monitored periodically during the session by HOD. Weekly syllabus completion report is submitted to IQAC department by the respective departments. Monthly reports are also submitted by the faculties to mention their progress and involvement in

the institute throughout. Laboratory manuals are prepared in advance. Laboratory procurements are done before the semester to ensure availability of equipments for the practicals. The college gives special importance to students' projects. Project Standard operating Practices is conveyed to students before topic finalization. Project Topics are selected before the start of semester and project guides are allotted as per their specialization. Synopsis submission is done by the students before the current semester. Regular project progress seminars / presentations are carried out to check the progress of the students once a month. Sessional question paper settings are done by the faculties on the basis of course outcome and Blooms Taxonomy level fulfillment. The internal examination papers are first moderated by the Head of the Department and then forwarded to the examination department for further processing. Student hour and Library/Sports hour are the special features which ensure conduction of various student activities other than teaching for the students. The college has professional society student chapters like IEEE, ISTE, IETE, ASM, CSI etc. and has various student clubs along with active NSS cell. Each of the forums has a student activity committee/office bearer who takes care of coordination of the technical and non-technical events/skill development programs. Students and faculties are also encouraged to persuade MOOCS/SWAYAM/Coursera for various courses to enhance their knowledge and skills.
