Everything is good

Good

Yes

Nothing

Nice

....

Most of the teachers in clg are learn very effectively with which everyone get a confidance and inhance their knowledge

Teachers are really good, but try to motivate students

Overall it is good

.....

I don't think so there is any suggestions from my side to the institution to improve the overall teaching, learning experience.. They are actually playing their role very effectively.

While internal practicals must ask tough questions and provide better knowledge of individual practicals.

Co curricular activities should be conducted often and teachers should allow students to participate in it without reducing their internal marks

Everything is very good in our college from studies to all the circular activities

There is no suggestion every think is better then worst

Better resources for canteen and shops

Make teaching a two way interaction

It is nice experience

All the teachers are good but some of them can improve

Teaching in my institutions is very good they always encourage us

with the study experimental is also needed

Wants slow learning

Everything is fantastic

everything is fine.

The overall learning experience is quite great but it could be better with a few changes.

Best experience

Every thing is good.

By using visual representation

Teaching and learning is good and effective

teacher always ask for doubt and make two way interaction which is good for students understanding .I feel its good so there is no suggestions on my side.

More facilities should be provide

no

Each & every assignment as well as sessional papers must be always discussed after checking

.

It's good

I think the teaching & learning is really emphasized here and look after. Teachers are supportive about extra curricular activities as well. Maybe more focus on helping students manage it along with studies can be put forward by faculties and seniors.

The facilities guides us for our over all development and for studies, and encourages to participate in different activities. Provides many facilities which helps us to develop our skills.

Overall teaching with diverse learning is really necessary and it's the best thing of our institution. They provide us with all necessary practical based learning. Things to be improved according to me is that we should have an overall 100% syllabus test at the end so that we have a clear idea to attempt our university test and 3hrs of practice to attempt.

-

Try to reach every student and ask for their doubts.

All staff members are quite good at teaching.

No as such suggestion needed.

They are take care of us how to understanding the syllabus

I am grateful for learning new things from teachers as the simplifies difficult topics in a very easy way. And tried very hard to make that topic crystal clear . The teacher are very helpful if we asked doubt irrespective of which class they are teaching, all teachers are very friendly. But one thing I can suggest that it will be grateful if we(Student) can perform one presentation at the end of the chapter like a summary so that we can learn the chapter deeply and can share new facts which are not mentioned in the book by mating the chapter and subject more interesting and also we can build our communication skill and confidence

Should give some practical experience!!!

Overall, lectures are interactive and informative

Events are often organised by college

Practical example for teaching

Most of the teachers are really comforting..one can easily speak up to them, whatever is going on with you..and that's the best part.

None

—

In my opinion all the teaching staff is very good

The overall teaching-learning experience in our institution is really good.

N.A

Make teaching a two way interaction and try to reach every student and ask for their doubts.

Topics should be explained practically.

It's satisfactory.

Should use more realistic examples

It was neutral learning experience for me , hope get should be implemented in teaching of subject engineering mechanics, it was poorly understandable . And in maths also

all teachers teaches well.. they always guid us.

Proper time management for teaching and one to one attention to every engineering aspirant.

I accept teaching is good but some points of making student comfortable and identifying there problems and providing them proper solution ,giving them time and understanding them is much needed .the main i personally think making them more creative providing them the knowledge of tech platform for learning and for free internship, making them slowly ready for future skills, giving them creative task related to there branch is to be done .

Teaching is excellent, faculties are also excellent always understands us and motivate to participate in overall activities

I am fully satisfied with teachers teaching and aids used in the classroom. Just some amendments to be made for students who wish to participate in extra-curricular activities, so that are able to balance both and not just focus on academics.

Internship and job exposure through academic

Teachers should not force students to attend class without student's consents

In numerical subjects faculty should start from basics of that topic.

Continuously collaborate with industries and research institutions to bridge the gap between theory and practice. Gather feedback and make data-driven improvements for an enriched learning journey."

- 1) Use digital game-based learning.
- 2) Communicate with parents.

I think what teachers are teaching they're doing well

Every thing as per me is great 👍

Overall teaching learning is good

The institute must have been doing this earlier, but I'd like if we are given more opportunities to work with already established companies in our respective fields to get hands on experience offline. Industrial visits etc

It's a humble request to help us focusing on our practical knowledge of the concept and let the timing of college be flexible.

I was satisfied with the teaching and learning process

Overall it's good

Reduce Lecture Time

Teacher are very supportive and helpful

Teachers should recognize that students have diverse learning styles and adapt teaching methods to meet individual needs.

Use real-world examples: Relate theoretical concepts to real-life scenarios to make learning more relevant and practical.

I think, whenever teachers will start a new unit first of all they will give us some (max 40%)

basic knowledge about that topic , that'll easy to understand for student to studying new upcoming topic .

To be more practical based

Need to focus on developing communication skills of students

Use better graphics and visual media to engage students well

Better

Make teaching a two way interaction

After completion of every lesson take a revision test.

Overall the teaching facilities are too good in our college.I like the way of teaching of each one who have taught us during first year. I am very thankful to each and every teacher.

1.Extra curricular activities should be focused.

2. Renewed Books of few subjects must be available to students

According to me the teaching learning process is good in our college

Try to reach every student and ask for their doubts.

To give practice experience more

In my opinion the syllabus books in the library should be updated .
